

SS 26
SWEDISH DESIGN
SINCE 2006

WE LOVE FEET

AN IMPASSIONED STORY

Axelda's story actually begins long before the company came into existence. David Axelsson spent many years working at tanneries and selling shoes, during which he developed an interest in sheepskin products.

The more factories he visited, the more his interest grew until it became a passion, whereupon David founded Axelda with its own design studio and sales in Sweden.

Today, the company develops a range of sheepskin products and sandals with sales in Europe. Axelda has established itself as a highly reputable brand thanks to its strong corporate social responsibility, its own product development activities and rigorous controls and testing of chemicals and production processes that provide assurance of quality.

HAPPY FEET

Fundamental to our production is the understanding that feet are happiest when they are warm, dry, airy and cool. All year round. And when your feet are happy, then so are you. Solid experience and extensive knowledge of different types of materials and their qualities provide us with a firm base on which to work continuously with innovation, development and improvement. We have long-standing relationships and offer our customers Swedish design with a focus on sustainability and quality.

A SUSTAINABLE BRAND

As a brand supplier, Axelda guarantees that all of our products are consistently produced to high quality standards. Whether they are crafted from sheepskin or 100% vegan materials. Waterproof or recyclable. We closely monitor the entire product development process from start to finish. Beginning with the raw materials and their preparation through to how the end product is displayed on store shelves or delivered in a box in the most appealing way. How the products are visually presented on digital platforms or communicated through words and pictures for advertising. All with the aim of creating a unique customer experience for everyone who wears products from Axelda.

CODE OF CONDUCT

Axelda is committed to ensuring that our products are manufactured under ethical and environmentally-sound conditions. Our Code of Conduct will ensure that our producers respect all the rights of the employees. These rights are enshrined in the UN Universal Declaration of Human Rights, the UN Convention on Children's Rights, the UN Convention on the Elimination of all Forms of Discrimination Against Women, the International Labour Organization's (ILO) conventions, and national and international laws and regulations.

We require our suppliers and subcontractors to accept our Code of Conduct and sign an agreement.

To ensure compliance with our Code of Conduct, we continuously conduct assessments, evaluations and audits of all our suppliers and, to the fullest extent possible, of their subcontractors.
