

**Podowell**

A big step for your comfort and well-being

**PROFESSIONAL  
GUIDE**

**Autumn - Winter  
2025**

## UNDERSTAND THE EXPECTATIONS OF CUSTOMERS

In order to understand better customers' expectations Podowell got involved in the ADOCS' researches. This French program aims to improve the offer of shoes. This study was initiated by the department of Trade and Industry, the French Shoe Federation, the Leather Technical Centre and a group of French companies that were chosen for the quality of their products. **It aims to improve the products that companies can offer to meet the requirements of customers in terms of estheticism and technicity.**

## 3 TECHNICAL ASPECTS

To understand how senior feet work, the Leather Technical Centre made some experiments.

### 1 ANTHROPOMETRIC MEASURES

A precise knowledge of the general morphology of senior feet will help design more well-fitted shoes. People's feet were scanned with a 3D scan to get their measurements.

The aim is to have 600 foot measurements of people aged over 50 years-old to get a representative panel with reliable data.

### 2 ERGONOMIC ANALYSIS

Are shoes adapted to everyday life gestures ? Is there a way to improve phases such as putting-on, taking-off, falling prevention...?

The ergonomic analysis of shoes will enable the manufacturers to satisfy consumers' behaviour and to fulfil their expectations

### 3 LOCOMOTION ANALYSIS

For this study, people walked with shoes with special features. Various factors were evaluated such as static balance, dynamic balance or articular rigidity to determine a positive or negative influence of these features on the walking and the well-being of seniors.

## MEDICAL DEVICE

Serial therapeutic shoes are medical devices. These are regulated health products (EU REGULATION 2017/745 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of April 5, 2017) which therefore bear the CE marking.

Since 1930, Podowell® has designed and manufactured orthopedic footwear which is ideal for those who have sensitive or painful feet.

The collaboration between Podowell® and the orthopedic industry has resulted in a variety of innovative shoes that provide a stable and comfortable fit for every lifestyle.

Podowell® offers a range of roomy, flexible and washable footwear with a touch of French elegance.

Not only is this line from Podowell® great for tired feet, it is also ideal for patients suffering from ulceration, neuropathy, diabetes, oedema or post-operative swelling and bandages.

Podowell® has become the preferred supplier to healthcare professionals in over 32 countries.

## 4 FITTINGS

Based on the width of the insole and the feet's volume.

**Normal :**  
standard and comfortable fitting room

**F to G fitting**

**Large :**  
more fitting room to protect swollen, painful or deformed feet

**H to I fitting**

**Extra large :**  
substantial fitting room to fit post-operative, diabetic or seriously swollen feet

**J to K fitting**

**Extra Extra large :**  
maximum of volume to fit oedema or lymphoedema

**L to M fitting**

## LOGOS LEGEND

Machine washable at 30°C maximum

Hand-wash at 30°C maximum

Removable insole that enables the replacement by personalised orthotics

Removable insole and insert to adapt the volume of the shoe

Memory foam insole that reduces plantar pain

Antibacterial treatment that limits the development of bacteria and odors even after washing. Biocide treated product : antibacterial. Active substance : zinc pyrithione.

Antibacterial treatment that limits the development of bacteria and odors even after washing. Biocide treated product : antibacterial. Active substance : silver chloride.

Antibacterial treatment that limits the development of bacteria and odors even after washing. Biocide treated product : antibacterial. Active substance : silver chloride and zinc pyrithione.

Stretchable material on sensitive zones to protect sore feet

Adjustable strap for a perfect fitting

Wool lining, naturally warm and antibacterial

Insole in leather for more comfort on the feet

On Steam® lining for a soft, durable and anti-moisture product

Leather with On Steam® lining for a soft, durable and anti-moisture product

Design and material specially selected to reduce water penetration

Product certified in Germany with a «Hilfsmittelverzeichnisnummer»

- very breathable, allows moisture to escape
- offering optimal resistance to weather conditions (rain, snow, wind, etc.)
- allowing faster drying in case of rain

**WILL NEW STYLE**

Colour: Grey

Sizes: 39 - 46

## SPECIALLY DESIGNED FOR DIABETICS

For several years, Podowell has been working in association with health professionals in order to develop specific products for people suffering from diabetes.

Because of the loss of sensation, diabetic people have to take great care of their feet and the choice of their shoes. Unspotted injuries are liable to worsen because of healing difficulties. The risks of complications can go as far as amputation. Diabetic people are recommended to use shoes with certain characteristics for prevention:

- **Seam free on sensitive areas (full lining, external stiffening) to avoid any micro-traumatism.**
- **Removable insoles that can be replaced by specific orthotics,**
- **Low heel height to limit hyper-pressure zones at the front of the foot.**
- **Large fitting room to avoid any pressure also in case of foot irregularity such as hallux valgus, corn, callus...**
- **Protection from external risks thanks to a thick lining, a stiff upper and a wide edged sole.**

The choice of suitable shoes must be accompanied by a daily observation of the feet.

**AQUITAINE**
